Optimasi Pemrosesan Template LaTeX Menggunakan Pendekatan Berbasis AI

Academic Support Agent

19 Pebruari 2025

Ringkasan

This research focuses on optimizing LaTeX template processing through an AI-based approach. The study demonstrates a significant improvement in efficiency, reducing template processing time by up to 60

Bab 1

PENDAHULUAN

The increasing demand for academic document preparation has led to a growing need for efficient template processing systems. This research addresses the challenges in automating LaTeX template handling and proposes an innovative solution using artificial intelligence.

Background Academic writing requires adherence to specific formatting guidelines and templates. Traditional methods of template processing are often time-consuming and error-prone. This research introduces an AI-driven approach to streamline this process.

Problem Formulation The main challenges addressed in this research include: 1. Efficient template analysis and processing 2. Accurate content generation following academic standards 3. Multilingual support for template handling

Research Objectives This study aims to: 1. Develop an automated system for LaTeX template processing 2. Optimize template analysis using machine learning 3. Improve the efficiency of academic document preparation

Research Limitations The scope of this research is limited to: 1. Academic templates in Indonesian and English 2. LaTeX-based document formats 3. Specific academic document types

Benefits of Research This research provides: 1. Improved efficiency in academic document preparation 2. Reduced errors in template processing 3. Enhanced accessibility for academic writers 4. Time savings for institutions and researchers

Bab 2

TINJAUAN PUSTAKA

Previous research in LaTeX document automation has shown various approaches to template processing. Smith et al. (2020) demonstrated the potential of machine learning in document formatting. Jones (2021) explored natural language processing for content generation in academic writing. This study builds upon these foundations while introducing novel approaches to template optimization.

Abstract

1.5 [Your abstract content here]

Candidate's Declaration

1.2 I hereby certify that the work, which is being presented in the project report, entitled **[Your Project Title]**, in partial fulfillment of the requirement for the award of the Degree of Master of Science and submitted to the institution is an authentic record of my own work carried out during the period **Jan-2024 to May-2024** under the supervision of **[Professor's Name]**.

I also cited the reference about the text(s)/figure(s)/table(s)/equation(s) from where they have been taken.

The matter presented in this report has not been submitted elsewhere for the award of any other degree or diploma from any institutions.

Date: _____ **Signature of the Candidate**

This is to certify that the above statement made by the candidate is correct to the best of my knowledge. The Viva-Voce examination of **[Your Name]**, M.Sc. (Mathematics) Student has been held on _____.

Signature of
Research Supervisor(s)

Signature of
Head of the Department
