Bab 4

Literature Review

Technical writing is writing or drafting technical communication used in technical and occupational fields[1], such as computer hardware and software[2], engineering, chemistry, aeronautics, robotics, finance[3], medical, consumer electronics, biotechnology, and forestry. Technical writing encompasses the largest sub-field in technical communication. See figure 4.1 that shows the autonomous systems in Internet.

Gambar 4.1: Autonomous System Hierarchy

4.1 section1

[2]

4.1.1 title 2

[3]
The system is described by the equation 4.1 below. Here y is the ordinate and x is the abscissa , m is the slope and c a constant.

$$y = mx + c \tag{4.1}$$

Page centered and unnumbered multiple equations. The * symbol supresses equation numbering.
2x - 5y = 8
3x + 9y = -12
Side by side figures can be created using this environment. See fig 4.4 below.
