Once upon a time... This document shows how you can get ePub-like formatting in LaTeX with the `memoir` document class. You can't yet export directly to ePub from writeLaTeX, but you can download the source and run it through a format conversion tool, such as `htlatex` to get HTML, and then go from HTML to ePub with a tool like Sigil or Calibre. See `http://tex.stackexchange.com/questions/16569` for more advice. And they lived happily ever after.
