Ringkasan

PENDAHULUAN
TINJAUAN PUSTAKA
preamble
Worksheet completed with Octave.

Question 1

[leftmargin=!,labelindent=5pt]Enter your equations and make them left-aligned f(x) = x^2
$g(x) = \frac{1}{x}$
$F(x) = \int_b^a \frac{1}{3}x^3$ Adding figures is easy!

Gambar 1: A goose.

2.

3. To add Matlab code, upload your file and include it here: [caption=My Matlab script!]matlab$_files/matlab.m$

4. A console output:

   [frame=single] Use a Verbatim section to show console output. All tabs and spaces are shown exactly the way you enter them with monospaced font!

Question 2

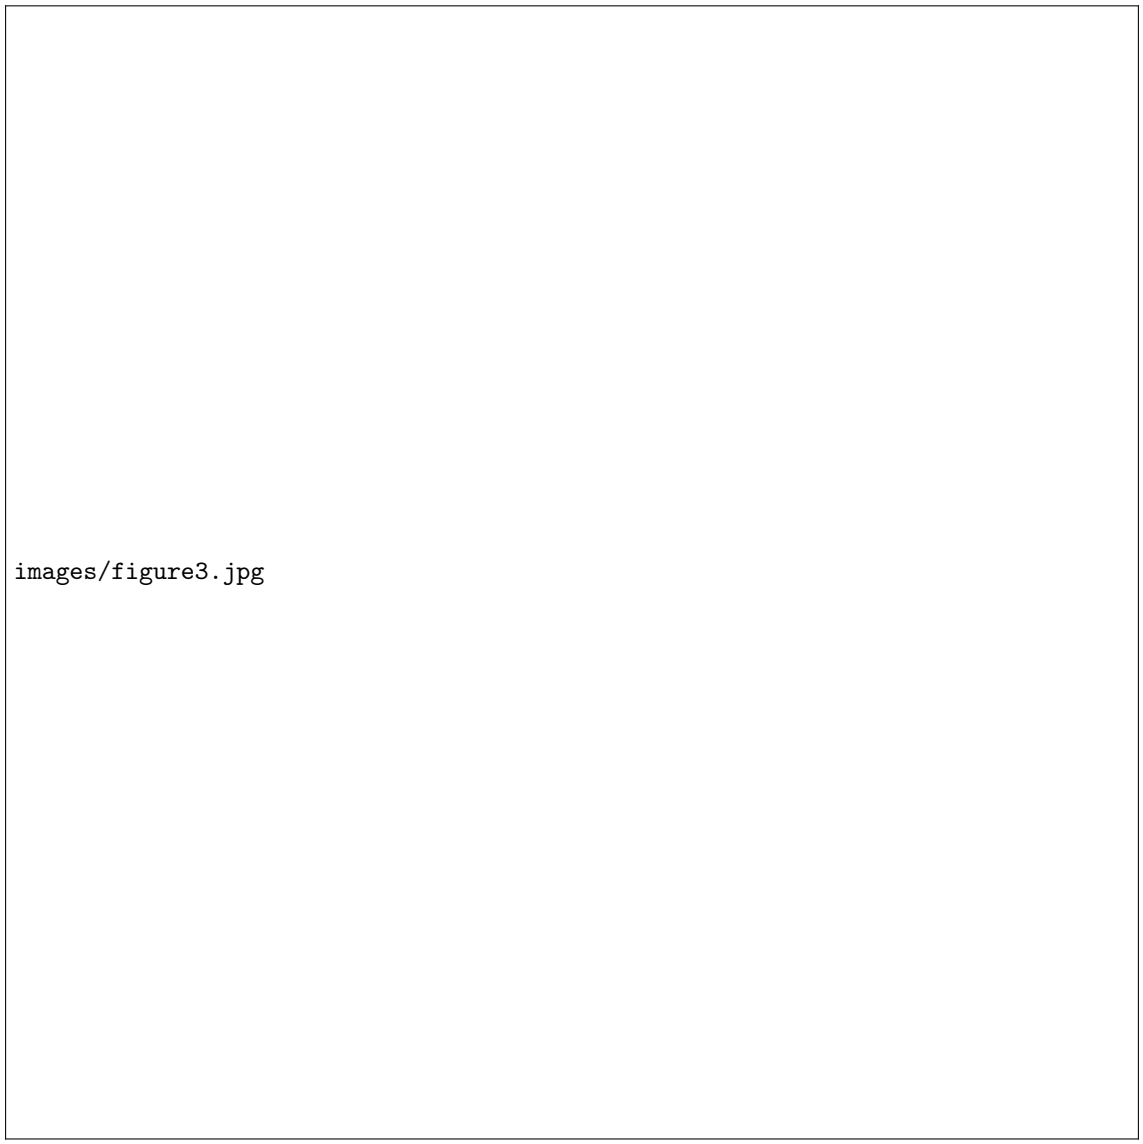

[leftmargin=!,labelindent=5pt]Equations from parts 1 and 2

1. (a) Write the equation of the surface in the form $z = f(x, y)$. f(x)=(x+a)(x+b)
   L' = L$\sqrt{1 - \frac{v^2}{c^2}}$
   $\lim_{x \to 0} \frac{e^x - 1}{2x}$
   $\left[\frac{0}{0}\right]$H=
   $\lim_{x \to 0} \frac{e^x}{2} = \frac{1}{2}$

   (b) Make inline math with dollar dollar y'all *woo*! Also centered equations. Tell LaTeX where you want to align equations with &. f(x) = x^2
   $g(x) = \frac{1}{x}$
   $F(x) = \int_b^a \frac{1}{3}x^3$

2. Plots for Part 3

   (a) Good times.
