[name=intro,column=0,row=0]Introduction

- Posters are often used at conferences for presenting exciting new research results.
- So far no official poster theme is available to the researchers and students at NUST School of Electrical Engineering and Computer Science (NUST-SEECS).
- The present theme changes this.
- The theme is a particular configuration of the baposter poster template [1] which you can find here `http://www.brian-amberg.de/uni/poster/` and must have installed in order to use this poster theme.

[name=usage,column=0,below=intro]Usage

- To use this poster theme, place the `namkeenposter.tex` file in your preferred folder and modify the file to your needs.
- You can read more about how you can modify the theme in the documentation for the baposter template which you can find here `http://www.brian-amberg.de/uni/poster/`.

[name=lists,column=0,below=usage]Lists Itemize

- item 1
  - subitem 1
    - subsubitem 1
      - subsubsubitem 1
      - subsubsubitem 2
    - subsubitem 2
  - subitem 2
- item 2

Enumerate

1. item 1
   (a) subitem 1
      i. subsubitem 1
         A. subsubsubitem 1
         B. subsubsubitem 2

ii. subsubitem 2

(b) subitem 2

2. item 2

Description

desc 1 item 1

desc 1 subitem 1

desc 1 subsubitem 1

desc 1 subsubsubitem 1

desc 2 subsubsubitem 2

desc 2 subsubitem 2

desc 2 subitem 2

desc 2 item 2

[name=equation,column=0,below=lists,above=bottom]Equations Here is an example of an equation

$$f_X(x|\mu,\sigma^2) = \frac{1}{\sqrt{2\pi\sigma^2}} \exp\left\{\frac{1}{2\sigma^2}(x-\mu)^2\right\} \tag{1}$$

[name=install,span=2,column=1,row=0]Installation You can either make a local or a global installation of the baposter poster template [1].

Local: Place the `baposter.cls` file in the same folder as the poster file `taralliposter.tex`

Global: Place the `baposter.cls` file in your local latex-directory tree. This is by default `<somewhere>/textmf/tex/late` where `<somewhere>` is

GNU/Linux: `/home/<username>`

Windows XP: `c:\Document and Settings\<username>`

Windows Vista+: `c:\Users\<username>`

Mac OSX `/home/<username>/Library`

On GNU/Linux and Windows, you have to update the filename database after placing `baposter.cls` in the correct folder. This is done by

GNU/Linux: `$ texhash ~/texmf`

Windows with MiKTeX Open the MiKTeX Settings dialog and click 'Refresh FNDB'.

Windows with TeX Live Open the TeX Live Manager dialog and select 'Update filename database' under 'Actions'.

[name=figures,column=1,below=install,above=bottom]Figures and Tables You cannot use floats in the baposter template. However, you can use figure captions by using `\captionof` instead of `\caption`. This is demonstrated in Fig. 1. Moreover, you can also use `\label` and `\ref` to make references to your figures and/or tables.

Figure 1: Here is a figure caption

As you can see, the text background is not white. If your figures do not have a transparent background, this may look too ugly for you. You can of course change the background colour through the `boxColorOne` option. Alternatively, you can make the background transparent. In Matlab, the following example demonstrates how this is done

```
   f1 = figure(1);
set(f1,'Color','none');
```

You can also use `pgfplots` [2] for plotting your Matlab data. This is not that hard and the resulting plots are much nicer than Matlab plots, so I will strongly recommend that you have a look at `pgfplots` right here `http://sourceforge.net/projects/pgfplots/`.

header 1	header 2	header 3
data (1,1)	data (1,2)	data (1,3)
data (2,1)	data (2,2)	data (2,3)
data (3,1)	data (3,2)	data (3,3)

Table 1: A very simple table with booktabs

[name=problems,column=2,below=install]Known Problems

- The math matrix environment `\begin{matrix} ... \end{matrix}` causes an error. I do not know why. Use the array environment until the problem is resolved.

[name=feedback,column=2,below=problems]Feedback

- This poster theme has been tested with baposter v. 2.0, and it can be downloaded from my website [3] or my personal website [4].
- If you find a bug in this theme (and not in the baposter template), please do not hesitate to contact me. There is a FAQ at the baposter website [1], if you should have any problems with it.
