Lab 00

Title of the lab

Student:
NAME HERE
Department of Atmospheric Sciences
University of Hawaii at Manoa

19 Pebruari 2025

Daftar Isi

1 Questions **2**
Q1 2
Q2 2
Q3 3
Q4 3

2 Figures **4**

3 Code **5**
Python 5

1 Questions

[Q1]Question 1 goes here in bold

answer goes here with a reference as an example ([?]).
[a)]

1. (a) **Subquestion 1**
   Answer goes here

   (b) **Subquestion 2**
   Answer goes here.

   (c) **Subquestion 3**
   Answer goes here

2. **Question 2 goes here in bold**

   You can insert code files also
   [fontsize=, linenos, breaklines=true, xleftmargin=0.75cm, frame=lines]matlabcode/MATLAB/test.m

   The first dimension is the number of vertical bins (125) and the second dimension is the number of profiles (37082). The maximum value for each vertical bin is plot in Figure ??.

Gambar 1: Maximum reflectivity for each vertical bin. The dashed line on bin 105 (0km) correspond to the closest height to mean sea level.

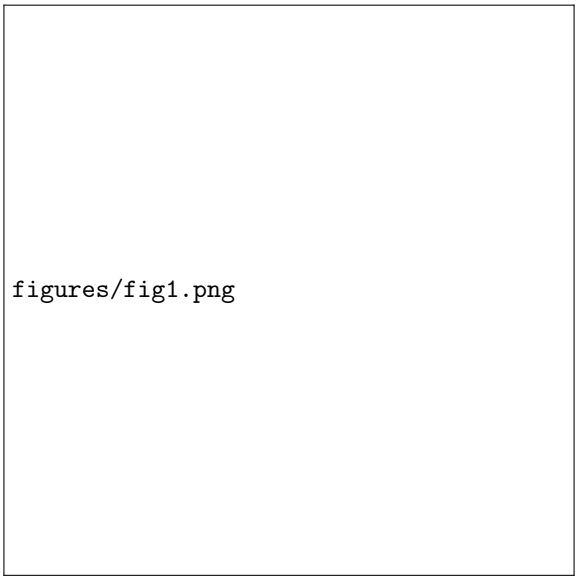

3. **Question 3 goes here in bold**

   answer goes here.

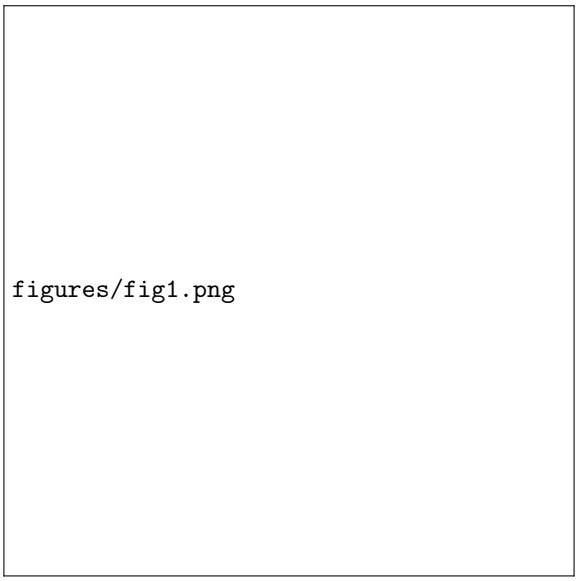

4. **Question 4 goes here in bold**

   answer goes here.

2 Figures

Gambar 2: A nice capybara.

Gambar 3: Same capybara

3 Code

Python

test.py

This code is used to generate figures **??** and **??**.

[fontsize=, linenos, breaklines=true, xleftmargin=0.75cm, frame=lines]pythoncode/Python/test.py
