Abstract

This report documents the program and the outcomes of Dagstuhl Seminar 11013 “Seminar Sample”. For a real abstract, one should write a little bit more here.

1 Executive Summary

[John Q. Open and Joan R. Access]John Q. Open (Dummy University Computing Laboratory, DC, open@dummyuni.org)
Joan R. Access (Department of Informatics, Dummy College Address, DC, access@dummycollege.org)

This summary summarizes the outcomes of our seminar. The seminar focused on

- important issues,
- relevant problems, and
- adequate solutions.

As a major result from the seminar, the following problems have been identified:

1. The problem of writing a brief, but concise executive summary.
2. The problem of collecting all abstracts from talks.
3. The problem of preparing summaries from working groups, open problem sessions, and panel discussions.

2 Overview of Talks

A sample talk [John Doe]John Doe (Somewhere University – Somewhere City, DC, john@doe.org)

Doe, John; Jane, Doe [http://dx.doi.org/1234.12/Doe.DOI.34]Doe, John; Doe, Jane, Sample talk abstracts used for Dagstuhl Reports, Journal of Seminar Documentation, 1:8, pp. 34–78. http://dx.doi.org/1234.12/Doe.DOI.34

Providing a documentation for a Dagstuhl Seminar is mandatory. We focus on talk abstracts and show that a talk abstract can be tagged with co-authors appearing in the joint-work-of-field. Furthermore, a talk abstract can state one main reference on which the talk is based.

Details are given in [1] and [2].

3 Working Groups

Working Group on Preparing an issue for Dagstuhl Reports [John Q. Open, Jane Doe]John Q. Open (Dummy University Computing Laboratory, DC, open@dummyuni.org)
Jane Doe (Somewhere University – Somewhere City, DC, jane@doe.org)

This working group focused on how to prepare an working group summary for an issue of Dagstuhl Reports.

3.0.1 Discussed Problems

- The authorship problem: Who was involved in the working group and who should act as author for this summary.
- Further problems.

3.0.2 Possible Approaches

For the authorship problem we found that naming all people involved in the working group is adequate.

3.0.3 Conclusions

The authorship problem occurs frequently, but it can be solved pragmatically.

4 Open Problems

A very open problem [Joan R. Access, Jane Doe]Joan R. Access (Dummy Affilliation, DC, access@dummycollege.org) Jane Doe (Somewhere University – Somewhere City, DC, jane@doe.org)

There may be some open problems with preparing an issue for Dagstuhl Reports. One possible solution is to contact Dagstuhl's editorial office at `reports@dagstuhl.de`. Details are given in [1] and [2].

5 Panel Discussions

5.1 Panel Discussion on "LaTeX Environments for Dagstuhl Reports"

5.1.1 Panelists

- Joan R. Access (Dummy Affilliation, DC)
- Jane Doe (Somewhere University, DC)
- John Q. Open (Dummy University Computing Laboratory, DC)

5.1.2 Statements

Joan R. Access This is the statement of Joan R. Access.

Jane Doe And this is the statement of Jane Doe.

John Q. Open John Q. Open – believe it or not – also gave a statement.

5.1.3 Discussion

The statements have been heavily discussed. Next time, John Doe should join the panelists.
