Tabel 1: PRISMA 2020 Checklist

lightgray Section and Topic	Item	Checklist Item
TITLE		
Title	1	Identify the report as a systematic review.
ABSTRACT		
Abstract	2	See the PRISMA 2020 for Abstracts Checklist.
INTRODUCTION		
Rationale	3	Describe the rationale for the review in the context of existing knowledge.
Objectives	4	Provide an explicit statement of the objective(s) or question(s) the review addresses.
METHODS		
Eligibility Criteria	5	Specify the inclusion and exclusion criteria for the review and how studies were grouped for the synt
Information sources	6	Specify all databases, registers, websites, organisations, reference lists and other sources searched or co Specify the date when each source was last searched or consulted.
Search strategy	7	Present the full search strategies for all databases, registers and websites, including any filters and li
Selection process	8	Specify the methods used to decide whether a study met the inclusion criteria of the review, inclu screened each record and each report retrieved, whether they worked independently, and if applica tools used in the process.
Data collection process	9	Specify the methods used to collect data from reports, including how many reviewers collected data they worked independently, any processes for obtaining or confirming data from study investigators of automation tools used in the process.
22.5cmData items	10a	List and define all outcomes for which data were sought. Specify whether all results that were comp domain in each study were sought (e.g. for all measures, time points, analyses), and if not, the met results to collect.
	10b	List and define all other variables for which data were sought (e.g. participant and intervention charac Describe any assumptions made about any missing or unclear information.
Study risk of bias assessment	11	Specify the methods used to assess risk of bias in the included studies, including details of the tool(s) assessed each study and whether they worked independently, and if applicable, details of automation
Effect measures	12	Specify for each outcome the effect measure(s) (e.g. risk ratio, mean difference) used in the synthesis
62.5cmSynthesis methods	13a	Describe the processes used to decide which studies were eligible for each synthesis (e.g. tabulati characteristics and comparing against the planned groups for each synthesis (item #5)).
	13b	Describe any methods required to prepare the data for presentation or synthesis, such as handling of m or data conversions.
	13c	Describe any methods used to tabulate or visually display results of individual studies and syntheses
	13d	Describe any methods used to synthesize results and provide a rationale for the choice(s). If met describe the model(s), method(s) to identify the presence and extent of statistical heterogeneity, and
	13e	Describe any methods used to explore possible causes of heterogeneity among study results (e.g. regression).
	13f	Describe any sensitivity analyses conducted to assess robustness of the synthesized results.
Reporting bias assessment	14	Describe any methods used to assess risk of bias due to missing results in a synthesis (arising from r
Certainty assessment	15	Describe any methods used to assess certainty (or confidence) in the body of evidence for an outcom

Tabel 2: PRISMA 2020 Checklist, Cont'd.

lightgray Section and Topic	Item	Checklist Item
RESULTS		
22.5cmStudy selection	16a	Describe the results of the search and selection process, from the number of records identified in th studies included in the review, ideally using a flow diagram.
	16b	Cite studies that might appear to meet the inclusion criteria, but which were excluded, and explain
Study Characteristics	17	Cite each included study and present its characteristics.
Risk of bias in studies	18	Present assessments of risk of bias for each included study.
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.
42.5cmResults of syntheses	20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies
	20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each t its precision (e.g. confidence/credible interval) and measures of statistical heterogeneity. If compa direction of the effect.
	20c	Present results of all investigations of possible causes of heterogeneity among study results.
	20d	Present results of all sensitivity analyses conducted to assess the robustness of the synthesized result
Reporting biases	21	Present assessments of risk of bias due to missing results (arising from reporting biases) for each syn
Certainty of evidence	22	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed.
DISCUSSION		
42.5cmDiscussion	23a	Provide a general interpretation of the results in the context of other evidence.
	23b	Discuss any limitations of the evidence included in the review.
	23c	Discuss any limitations of the review processes used.
	23d	Discuss implications of the results for practice, policy, and future research.
OTHER INFORMATION		
32.5cmRegistration and protocol	24a	Provide registration information for the review, including register name and registration number, or not registered.
	24b	Indicate where the review protocol can be accessed, or state that a protocol was not prepared.
	24c	Describe and explain any amendments to information provided at registration or in the protocol.
Support	25	Describe sources of financial or non-financial support for the review, and the role of the funders or s
Competing interests	26	Declare any competing interests of review authors.
Availability of data, code and other materials	27	Report which of the following are publicly available and where they can be found: template data collec from included studies; data used for all analyses; analytic code; any other materials used in the revie

Tabel 3: PRISMA 2020 Abstract Checklist

lightgray Section and Topic	Item	Checklist Item
TITLE		
Title	1	Identify the report as a systematic review.
BACKGROUND		
Objectives	2	Provide an explicit statement of the main objective(s) or question(s) the review addresses
METHODS		
Eligibility criteria	3	Specify the inclusion and exclusion criteria for the review.
Information sources	4	Specify the information sources (e.g. databases, registers) used to identify studies and t searched.
Risk of bias	5	Specify the methods used to assess risk of bias in the included studies.
Synthesis of results	6	Specify the methods used to present and synthesise results.
RESULTS		
Included studies	7	Give the total number of included studies and participants and summarise relevant chara
Synthesis of results	8	Present results for main outcomes, preferably indicating the number of included studies a meta-analysis was done, report the summary estimate and confidence/credible interval. If the direction of the effect (i.e. which group is favoured).
DISCUSSION		
Limitations of evidence	9	Provide a brief summary of the limitations of the evidence included in the review (e.g. stud and imprecision).
Interpretation	10	Provide a general interpretation of the results and important implications.
OTHER		
Funding	11	Specify the primary source of funding for the review.
Registration	12	Provide the register name and registration number.
