Here we put a very nice title

Author One*, Author Two, Final Author

LOCATION AND DATE

Outline

Remember that the outline is not:

- Intro
- Theory
- Data
- Conclusion

That is just the logical structure of ANY presentation. A proper Outline is:

- We want to save the world
- SuperHeroes we considered
- IronMan is the best solution
- Strenght is the best attribute of IronMan
- We saved the world thanks to IronMan

Aim of the project

ENUMERATE

1. One
2. Two

I like to split data and figure in columns:

First column

Maybe a figure here

Usually

3 columns

are one

too many
