# Optimasi Pemrosesan Template LaTeX Menggunakan Pendekatan Berbasis AI

Academic Support Agent

19 Pebruari 2025

# Ringkasan

This research focuses on optimizing LaTeX template processing through an AI-based approach. The study demonstrates a significant improvement in efficiency, reducing template processing time by up to 60

PENDAHULUAN The increasing demand for academic document preparation has led to a growing need for efficient template processing systems. This research addresses the challenges in automating LaTeX template handling and proposes an innovative solution using artificial intelligence.

Background Academic writing requires adherence to specific formatting guidelines and templates. Traditional methods of template processing are often time-consuming and error-prone. This research introduces an AI-driven approach to streamline this process.

Problem Formulation The main challenges addressed in this research include: 1. Efficient template analysis and processing 2. Accurate content generation following academic standards 3.

Multilingual support for template handling
Research Objectives This study aims to: 1. Develop an automated system for LaTeX template processing 2. Optimize template analysis using machine learning 3. Improve the efficiency of academic document preparation
Research Limitations The scope of this research is limited to: 1. Academic templates in Indonesian and English 2. LaTeX-based document formats 3. Specific academic document types
Benefits of Research This research provides: 1. Improved efficiency in academic document preparation 2. Reduced errors in template processing 3. Enhanced accessibility for academic writers 4. Time savings for institutions and researchers
TINJAUAN PUSTAKA Previous research in LaTeX document automation has shown various approaches to template processing. Smith et al. (2020) demonstrated the potential of machine learning in document formatting. Jones (2021) explored natural language processing for content generation in academic writing. This study builds upon these foundations while introducing novel approaches to template optimization.

2

- THIS IS NOT AN OFFICIAL LEHIGH TEMPLATE.
- Modified from the original LaTeX template by Alex Pacheco.
- Followed the latest Lehigh University Branding & Visual Identity Guide.
- Modify if you have suggestions to improve it and pass on the modifications so that anyone interested in using LaTeX for presentations could benefit.
- Typing equations with *physics* package is always more convenient.

$$*Ut + (*U \cdot \nabla) * U - \nu * U = -\frac{1}{\rho} p + *g$$

# How to

# How to use it

## How to install it to your path

- Place the contents within your TEXINPUTS path. On Linux, modify the TEXINPUTS variable to point to the directory where these files exist.
- For example: bashexport TEXINPUTS=*HOME*/*LaTeX*//:TEXINPUTS
- On MacTeX, you need to install it to bash*HOME*/*Library*/*texmf Ifyouhaveadminpermissioncopyittoyour*$T_E$
- To use the theme, add the command latex[]beamerthemelehighdark to the preamble of your document.
- Compile using pdflatex to get the pdf file.
- Feel free to modify the theme to suit your needs.
