Bab 3

Introduction

The introduction will usually contain an overview of what is in your project document. Typically, it will be the last section you write.

Theorem 3.1 *Sometimes, you will want to state the main results of your document in the introduction.*

Remark 3.2 *LaTeX is clever, and automatically generates numbers for theorems, remarks and anything else you might want to label. You can give these an invisible name using* `\label{your-key}` *and referring back to it later using* `\ref{your-key}`*, for example the following number will be the same as the theorem above: Theorem* **??***.*

Similarly, you will want to reference external sources as you write your document. The basic way to do this is to add `\bibitem{your-chosen-key}`s at the end of your document (this template has three examples), and use `\cite{your-chosen-key}` to refer to it. For instance, if I wanted to cite the example document by Noether, I can write [**?**].

Mathematics is added using dollar signs for in-line math, i.e. $x^2 + y^2 = z^2$, or by using open-bracket close-bracket for a displayed equation.

$$c^2 = a^2 + b^2 - 2ab\cos\theta.$$

Ordered lists are written using the `enumerate` environment:

1. Hello.
2. This is the second item in my list.

I can also write unordered lists using `itemize`:

- Hello.

[scale=.6] [fill=purple, opacity=.3] (-3,-3) rectangle (3,3); (0,0) circle [radius=2pt]; at (0,4) A; at (4,0) $+$; [fill=red] (6,0) circle (.8cm); (6,0) circle [radius=2pt]; [above] at (6,1) ϵB; [below] at (6,-1) $_{\text{radius } = \ \epsilon}$; at (8,0) $=$;

[decorate,decoration=brace,amplitude=5pt, mirror] (-3,-3) – (3,-3) node[below] [black,midway, yshift=-4pt] $_{\text{length } = \ \iota}$;

[dotted, fill=blue, opacity=.1] (10,-3) rectangle (16,3);

at (13,0) $A + \epsilon B$;

[dotted, fill=blue, opacity=.1] (10,-3) rectangle (16,3);

[dotted, fill=red] (10,-3)–(10,-4) arc (270:180:1); [dotted, fill=red] (10,3)–(10,4) arc (90:180:1);
[dotted, fill=red] (16,3)–(16,4) arc (90:0:1); [dotted, fill=red] (16,-3)–(16,-4) arc (270:360:1);

[dotted] (10,-3)–(9,-3); [dotted] (16,-3)–(17,-3);

[dotted] (16,3)–(16,4); [dotted] (16,3)–(17,3);

[dotted] (10,3)–(9,3);

[dotted, fill=purple, opacity=.1] (10,-3) rectangle (16,3); [fill=purple, opacity=.1] (16,4)–(10,4) arc (90:180:1)–(9,-3)–(9,-3) arc (180:270:1)–(10,-4)–(16,-4)–(16,-4) arc (270:360:1)–(17,-3)–(17,3) arc (0:90:1);
