shortarticlesinglecolumn

This template is provided to help authors submitting working papers for the Interdisciplinary Laboratory of Computational Social Science (iLCSS) at UMD. The template was developed based on the PNAS template. Some examples of commonly used commands and features are listed below, to help you get started.

Your introduction goes here! . please start your introduction without including the word "Introduction" as a section heading (except for math articles in the Physical Sciences section); this heading is implied in the first paragraphs.

Sections: Theory, Methods, Results, Discussion...

Use section and subsection commands to organize your document. LaTeX handles all the formatting and numbering automatically.

1 Figures and Tables

Figures and Tables should be labeled and referenced in the standard way using the `\label{}` and `\ref{}` commands.

Figure 1: Placeholder image of a Network with a long example caption to show justification setting.

Figure 1 shows an example of how to insert a column-wide figure. To insert a figure wider than one column, please use the `\begin{figure*}...\end{figure*}` environment. Figures wider than one column should be sized to 11.4 cm or 17.8 cm wide. Use `\begin{SCfigure*}...\end{SCfigure*}` for a wide figure with side captions.

Tables

In addition to including your tables within this manuscript file, PNAS requires that each table be uploaded to the submission separately as a Table file. Please ensure that each table .tex file contains a preamble, the `\begin{document}` command, and the

Table 1: Character Level Combat Outcomes

	Dependent variable:		
	Combat Amount	Combat Variability	Combat Skill
	(1)	(2)	(3)
Man - Male	0.042***	5.659***	0.031***
	(0.002)	(0.056)	(0.0004)
Woman - Female	−0.026***	1.529***	0.011***
	(0.005)	(0.143)	(0.001)
Woman - Male	0.010	0.375	0.005*
	(0.009)	(0.272)	(0.002)
Player Age	−0.077***		−0.003***
	(0.001)		(0.0002)
Mil. Label	0.135***		0.060***
	(0.002)		(0.0004)
Constant		−97.425***	
		(0.046)	
Char. Order FEs	Y	N	Y
Create Date FEs	Y	N	Y
Observations	576,430	576,430	576,430
R^2	0.028	0.018	0.089

* p<0.05, ** p<0.01, *** p<0.001

This table reports coefficients and standards errors from ordinary least squares regressions. In all models we can reject the null that *Woman - Female* and *Woman - Male* are equivalent with $p < .01$. In models 2 and 3 we can reject the null that the gender gaps within sex are equivalent ((*Woman - Male*) - (*Woman - Female*) = *Man - Male*) with $p < .001$.
