[english]babel [utf8x]inputenc [T1]fontenc
[a4paper,margin=2cm]geometry
amsmath graphicx paralist 4pt

1. (10 points) Copy your code comments here. [A.]
2.
3.
4.
5.
6.
7.
8. (10 points) Examine the parallel data and answer questions. (Plots may appear in the appendix.) [1.]
9.
10.
11.
12.
13.
14.
15. (10 points) What language phenomena might influence what you observed above? *Your answer here.*

16. (10 points) Answers to questions about sampling, beam search, and dynamic programming. [1.]

17.

18.

19.

20. (10 points) Experiment with changes to the model, and explain results. *Your answer here.*

21. (10 points) Implement dropout, and explain the results. *Your answer here.*

22. (20 points) Implement attention. This question will be evaluated on the basis of your code.

23. (10 points) Explain the results of implementing attention. *Your answer here*

24. (10 points) Explain what you observe with attention. (Figures may appear in an appendix.) *Your answer here*

Optional: you may include an appendix after the line above. Everything above the line must appear in the first three pages of your submission.
