500 New Times Roman 3-5

Experiments of Modern Physics in Tsinghua University Mingyu LiProf. Wang keyword1, keyword2, keyword3, keyword4, keyword5

All words here are generated by translator. The content of the abstract, small number five Song font, no more than 500 words. A brief overview of the main experimental content and results. Requirements: The basic information and main points of the paper should appear in the abstract; A clear and compact overview of objective facts using standard and precise vocabulary and language; The overall structure of the abstract is rigorous, the ideas are clear, and the basic materials are reasonably organized. The English abstract is consistent with the content of the Chinese. The English abstract must be consistent with the content of the Chinese, passive voice, present tense. The font size is New Times Roman. The abstract in Chinese and English is the main content of the domestic and foreign databases, so the content of the abstract directly affects whether the paper can be included and cited after inclusion, and the author should pay great attention to it. Keywords are normalized words or phrases, and the number is generally 3-5. The content and order of Chinese and English keywords in the same article should be consistent.
