Academic Support Agent

February 19, 2025

1 Introduction

1aaaa@academicos.mx 2aaaa@academicos.mx 3aaaa@academicos.fr 4trtrtr@ctb.upm.es 5aaa@academicos.udg.mx (**Corresponding author**).

For the introduction, authors should be mindful of the broad readership of the journal. The introduction should set the stage for the importance of the work to a generalist reader and draw the reader in to the specific study. The scope and impact of the work should be clearly stated.

Authors are encouraged to:

- cite the supporting literature completely rather than select a subset of citations;
- provide important background citations, including relevant review papers (to help orient the non-specialist reader);
- to cite similar work in other chaos theory and applications.

2 First level section header

Use this level to group two or more closely related headings in a long article.

2.1 Second level section header

Second level section text.

2.1.1 Third level section header:

Third level section text. These headings may be numbered, but only when the numbers must be cited in the text.

3 In-text Citations

Add citations using the `\citep{}` command, for example Akgul2016 or for multiple citations, C.Sprott2000, rossler1976equation.

4 Figures and Tables

Figures and Tables should be labelled and referenced in the standard way using the `\label{}` and `\ref{}` commands.

4.1 Sample Figure

Figure 1 shows an example figure.

4.2 Sample Table

Table 1 shows an example table.

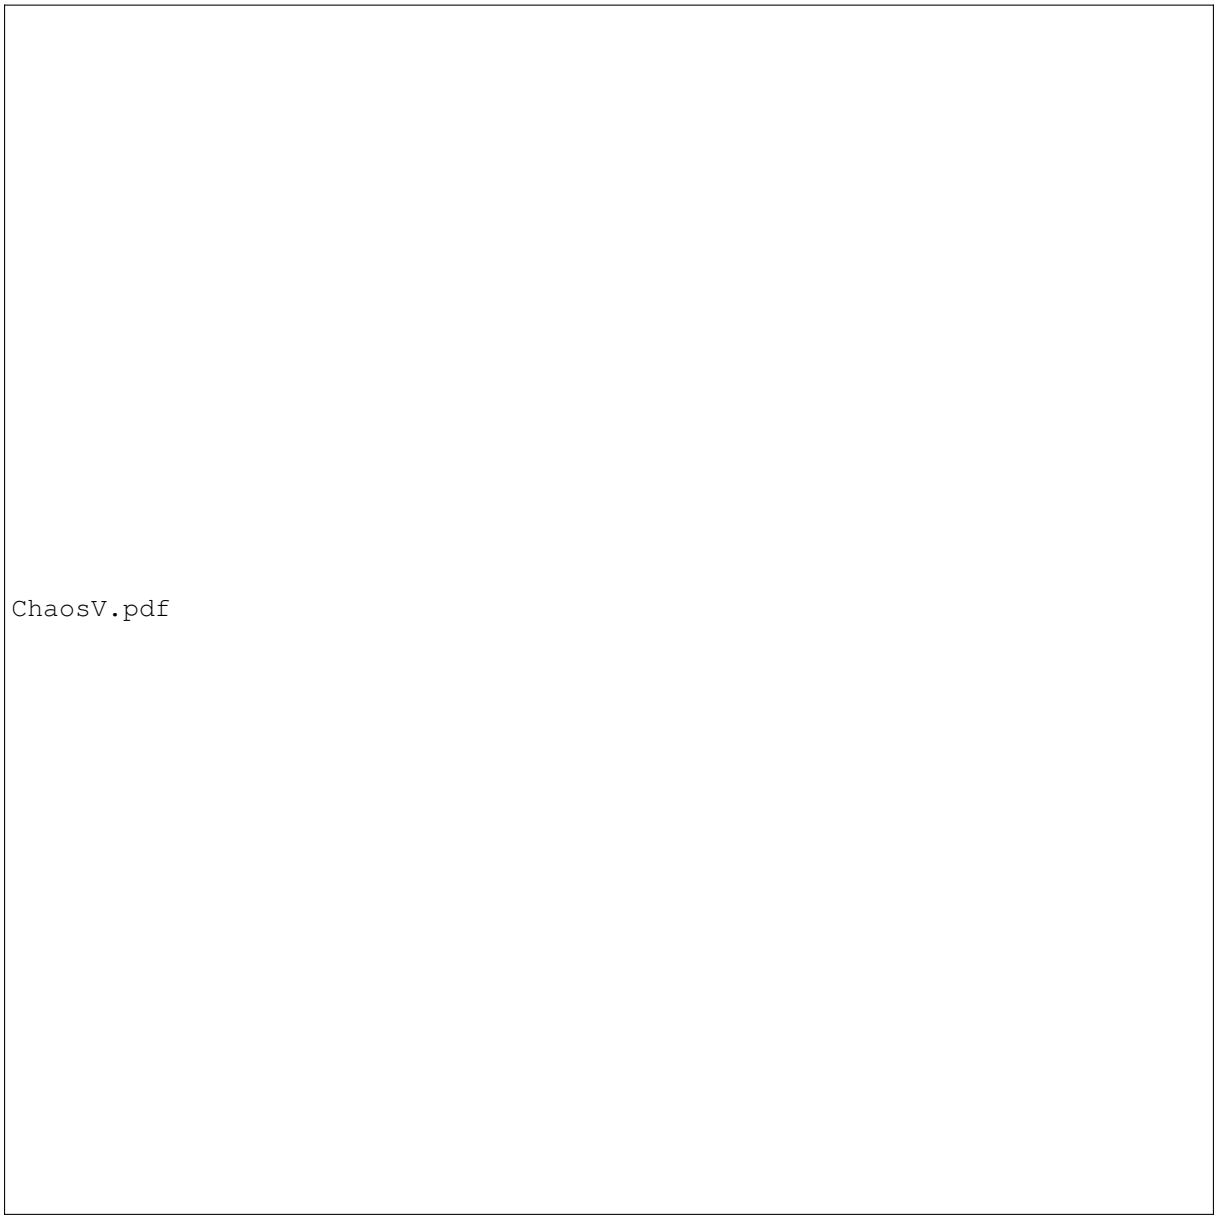

Figure 1: Example figure

Table 1: **Example table**

Student	Grade	Rank	Notes
Alice	82%	1	Performed very well.
Bob	65%	3	Not up to his usual standard.
Charlie	73%	2	A good attempt.

5 Sample Equation

$$S_n = \frac{X_1 + X_2 + \cdots + X_n}{n} = \frac{1}{n}\sum_{i}^{n} X_i \tag{1}$$

6 Results and Discussion

The results and discussion should not be repetitive. The results section should give a factual presentation of the data and all tables and figures should be referenced; the discussion should not summarize the results but provide an interpretation of the results, and should clearly delineate between the findings of the particular study and the possible impact of those findings in a larger context.

Acknowledgments

This work was supported by X University Scientific Research Projects Unit under Grants 0000-00-00-001, 0000-00-00-002.

Availability of data and material

Not applicable.

Conflicts of interest

The authors declare that there is no conflict of interest regarding the publication of this paper.
