Creating PocketMods with LaTeX

LianTze Lim

liantze@gmail.com

How to Use

- Just add `\usepackage{pocketmod}`
- Rearranges 8 pages on a sheet of paper, folded into a booklet
- Uses only a single side – ideal for recycling used paper!

How to Cut and Fold

- `http://www.pocketmod.com`
- `http://www.youtube.com/watch?v=IAb31rIeGZo`
- `\usepackage[showmarks]{pocketmod}` for guiding fold marks

Some Tips

- Try to keep your contents to 8 pages or less `;-)`
- Use large fonts! They'll be scaled to $\frac{1}{8}$ the size.
  - `extsizes` package
  - KOMA-script classes allow arbitrary body font size
  - Liberal uses of `\Large`, `\huge` etc

Some Ideas

- Daily planners
- Note pads, doodle sketchpads
- Conference/event itinerary handouts
- Prayer book/personal book of inspirational quotes
- Little books for little hands

Have fun!
