Conclusion

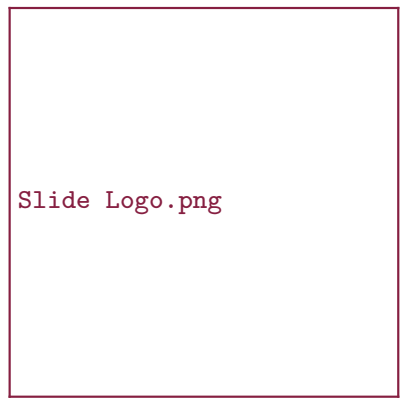

Title

To use this template, you can copy and just edit/add slides!

This is because all of the color customization occurs in the "Customize Themes" section in lines 12-51 of the code

The remainder of these slides serve as an example to show all the features you can use: bullets, buttons, sections, etc.

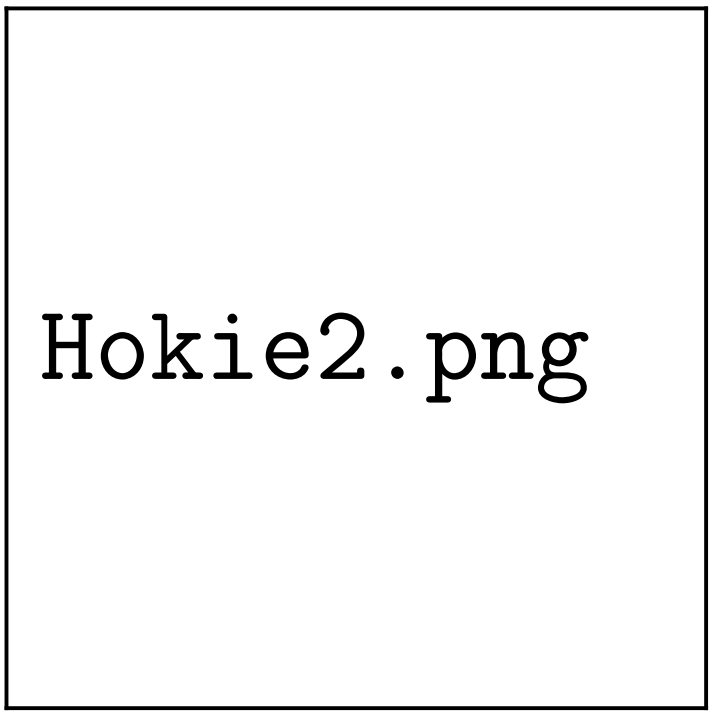

This was a labor of love, I hope you like it!

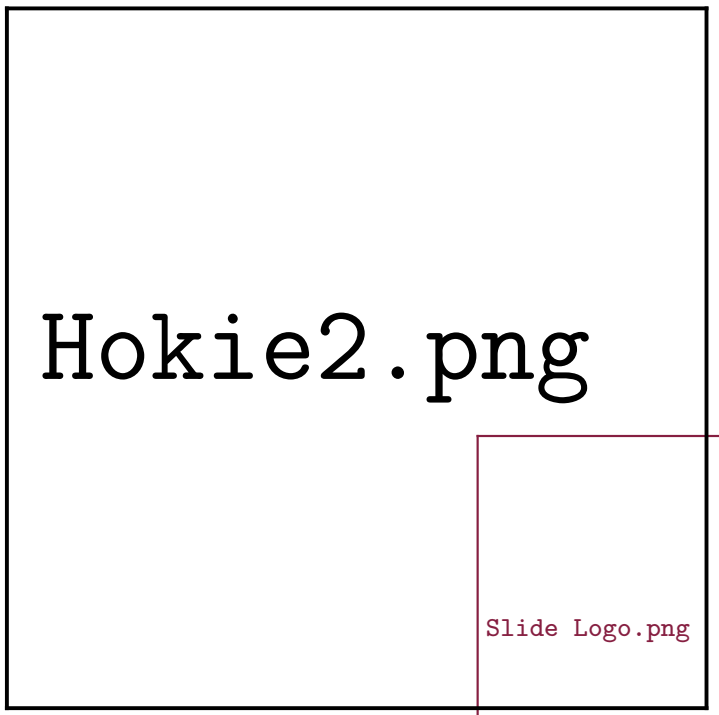

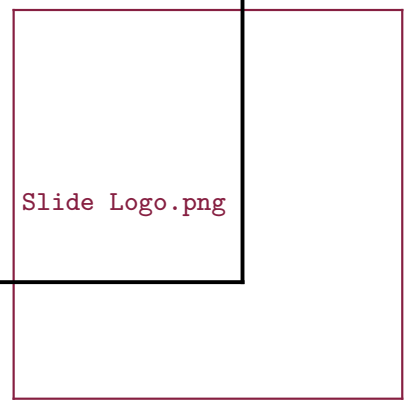

Another Title

and a subtitle!

Look at the code of this slide to see how columns made this formatting look nice.

Yet another title

You can use bullets too:

- Like this one
- & this one

A title

- You can also nest sub-bullets
  - Sub-bullet 1
  - Sub-bullet 2
  - Sub-bullet 3
  - Sub-bullet 4

You can add citations Tjstheim too

Below is a button that links to a slide in the appendix

Go to graphs

Slide Logo.png

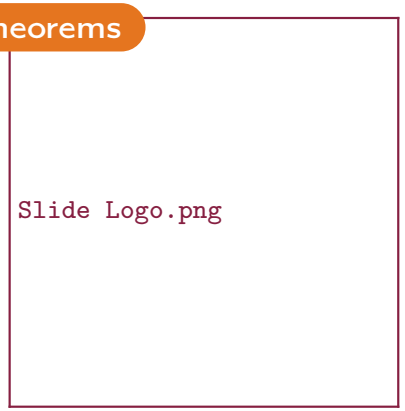

The Test Statistic

Here is a made up equation:

$$\hat{A} = \bar{m} - \hat{m}_S$$

Notice how these buttons are centered and evenly spread out:

Go to Terms Go to Definitions Go to Theorems

No way, another title!

myOrange Instead of bullets, you can index by number too

myOrange like this

Second to last title

Block Title

Block 1
