MAE 4000 Report 1: Sample Report Title Brandon S. Runnels August 8, 2016
You can put sentences on different lines. As long as there is not a blank line between them, they will get formatted as the same paragraph.

This line will get put into the next paragraph because it is separated from the above lines by a blank line. (Notice how indentation is handled automatically, even though you don't see it in the source file.)

1 An example section title

You can use the section, subsection, and subsubsection commands to create numbered headings in your report.

1.1 Here's an example of a subsection

Notice how the numbering is handled automatically.
