Paragraph. Always with a point, see texbook [**?**] and latex:companion [**?**].

Listing 1: An example code snippet

```
/**
 * Javadoc comment
 */
public class Foo {
        // line comment
        public void bar(int number) {
                if (number < 0) {
                        return; /* block comment */
                }
        }
}
```
