Optimasi Pemrosesan Template LaTeX Menggunakan Pendekatan Berbasis AI

Academic Support Agent

19 Pebruari 2025

Ringkasan

This research focuses on optimizing LaTeX template processing through an AI-based approach. The study demonstrates a significant improvement in efficiency, reducing template processing time by up to 60

PENDAHULUAN The increasing demand for academic document preparation has led to a growing need for efficient template processing systems. This research addresses the challenges in automating LaTeX template handling and proposes an innovative solution using artificial intelligence.

Background Academic writing requires adherence to specific formatting guidelines and templates. Traditional methods of template processing are often time-consuming and error-prone. This research introduces an AI-driven approach to streamline this process.

Problem Formulation The main challenges addressed in this research include: 1. Efficient template analysis and processing 2. Accurate content generation following academic standards 3. Multilingual support for template handling

Research Objectives This study aims to: 1. Develop an automated system for LaTeX template processing 2. Optimize template analysis using machine learning 3. Improve the efficiency of academic document preparation

Research Limitations The scope of this research is limited to: 1. Academic templates in Indonesian and English 2. LaTeX-based document formats 3. Specific academic document types

Benefits of Research This research provides: 1. Improved efficiency in academic document preparation 2. Reduced errors in template processing 3. Enhanced accessibility for academic writers 4. Time savings for institutions and researchers

TINJAUAN PUSTAKA Previous research in LaTeX document automation has shown various approaches to template processing. Smith et al. (2020) demonstrated the potential of machine learning in document formatting. Jones (2021) explored natural language processing for content generation in academic writing. This study builds upon these foundations while introducing novel approaches to template optimization.

Poster Evaluation Form

Instituto Tecnológico de Morelia

Maestría en Ciencias en Ingeniería Electrónica Ver 2-Rev-2022

Presenter's name: _____

Instructions: Please mark the score given for each evaluation criterion below.

c p8cmccccc No. DESCRIPTIONPoor Fair Aver GoodExcellent

12345

1

1.1	Content's clarity
1.2	Content's quality
1.3	Originality and complexity
1.4	Project's impact
1.5	Main points' support

Pts:_____

2

2.1	Layout: organized, effective, and interesting
2.2	Visual aids and support
2.3	Important information is easy to grasp
2.4	Topic and main objective clearly identified
2.5	Informative & clear hypothesis

Pts:_____

3

3.1	Professional and confident
3.2	Engaged with audience
3.3	Loud and clear voice
3.4	Appropriate technical language
3.5	Response to reviewer questions

Pts:_____

4

4.1 Please evaluate the proposed methodology considering that the student must define an experimental setup, measurements, procedures, or analysis. Therefore, the methodology results must be used to support the student's hypothesis. **Total of 25 points**

Pts:_____

Do you have any suggestions for improvements? (use backside)

Please note: This form will be given to the presenter after the event to provide feedback
