Unfortunatly the chosen publisher does not accept pdf anymore. The only format available is doc. The organisation commitee is sorry for that. It was a board decision and we respect it.

LaTeX Template

FULL First Author[1,a]*, FULL Second Author[2,b] and FULL Last Author [1,2,c]
[1] Full address of the first author, including country
[2] Full address of the second author, including country
[a]email@email.fr, [b]email@email.fr, [c]email@email.fr (*corresponding author)

Keywords: List between 3 and 5 keywords covered in your paper (No more than one line)
Abstract: This template explains and demonstrates how to prepare your print-ready paper for ESAFORM 2024. Please make the page settings of your word processor to letter format (21x29.7 cm); with the margins: bottom 2 cm and top 2.5 cm, right/left margins must be 1 in (2.5 cm). Your manuscript could be reduced by approximately 25% by the publisher in print size, keep this in mind when designing your figures and tables.

Introduction

All manuscript must be written in English, the same applies to the tables and figures. The size of the paper is expected to be from 6 up to 10 pages.

The paper must be submitted in Word format**.**

Do not use **boldface** typing or CAPITAL LETTERS for emphasizing a word or phrase except for section headings (cf. remarks on section headings, below).

Article Organization

The section headings are in boldface capital and lowercase letters. No numbers on the headings. You can keep simple without latex sections.

Second level Heading: Second level headings are typed as part of the succeeding paragraph (like the subsection heading of this paragraph). Please see some pieces of advice about the article organization:

- Page Numbers: Please, do not number your paper.
- Tables: Tables (refer with: Table 1, Table 2, ...) should be presented as part of the text, but in such a way as to avoid confusion with the text. A descriptive title should be placed above each table. Units in tables should be given in square brackets [meV].
- Special Sign should always be written in with the fonts Times New Roman or Arial, especially in the figures and tables.
- Macros: Do not use any macros for the figures and tables.
- If you follow the "checklist" your paper will conform to the requirements of the publisher and facilitate heavy publication process. Thank you for your help in this matter.

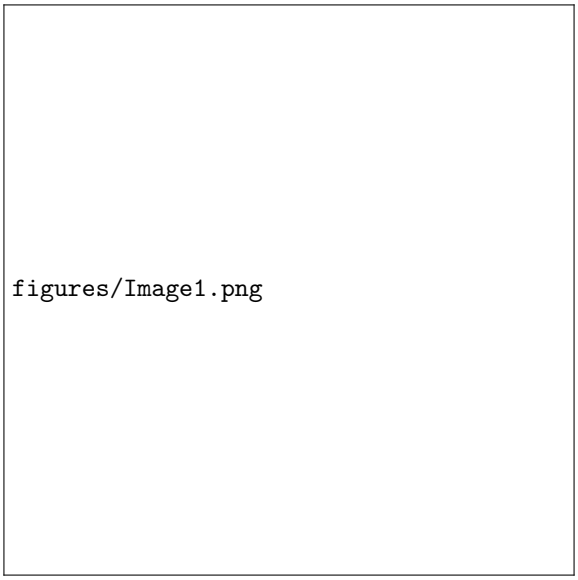

Figures (refer with: Fig. 1, Fig. 2, ...) also should be presented as part of the text, leaving enough space so that the caption will not be confused with the text. The caption should be self-contained and placed directly below the figure, as presented in Fig.1. Generally, only original drawings or photographic reproductions are acceptable. Please take care to insert the figures in correct alignment with the text. The pictures should have a minimum resolution of 300 dpi in the exported pdf. Color figures are welcome.

Equations (refer with: Eq. 1, Eq. 2, ...) should be indented 5 mm. There should be one line of space above the equation and one line of space below it before the text continues, as seen Eq.1. The equations have to be numbered sequentially, and the number put in parentheses at the right-hand edge of the text.

$$c^2 = a^2 + b^2 \tag{1}$$

Literature References

All references are cited in the text just by square brackets [**?**] for article and book [**?**]. Two or more references at a time may be put in one set of brackets [**?**, **?**]. Please avoid more than 3 references together. The references are to be numbered in the order in which they are cited in the text and listed in References section. All authors of each reference must be cited.
