Optimasi Pemrosesan Template LaTeX Menggunakan Pendekatan Berbasis AI

Academic Support Agent

19 Pebruari 2025

Ringkasan

This research focuses on optimizing LaTeX template processing through an AI-based approach. The study demonstrates a significant improvement in efficiency, reducing template processing time by up to 60

Bab 1

PENDAHULUAN

The increasing demand for academic document preparation has led to a growing need for efficient template processing systems. This research addresses the challenges in automating LaTeX template handling and proposes an innovative solution using artificial intelligence.

Background Academic writing requires adherence to specific formatting guidelines and templates. Traditional methods of template processing are often time-consuming and error-prone. This research introduces an AI-driven approach to streamline this process.

Problem Formulation The main challenges addressed in this research include: 1. Efficient template analysis and processing 2. Accurate content generation following academic standards 3. Multilingual support for template handling

Research Objectives This study aims to: 1. Develop an automated system for LaTeX template processing 2. Optimize template analysis using machine learning 3. Improve the efficiency of academic document preparation

Research Limitations The scope of this research is limited to: 1. Academic templates in Indonesian and English 2. LaTeX-based document formats 3. Specific academic document types

Benefits of Research This research provides: 1. Improved efficiency in academic document preparation 2. Reduced errors in template processing 3. Enhanced accessibility for academic writers 4. Time savings for institutions and researchers

Bab 2

TINJAUAN PUSTAKA

Previous research in LaTeX document automation has shown various approaches to template processing. Smith et al. (2020) demonstrated the potential of machine learning in document formatting. Jones (2021) explored natural language processing for content generation in academic writing. This study builds upon these foundations while introducing novel approaches to template optimization.

CERTIFICATE

I hereby certify that the work which is being presented in the M.Tech. Dissertation entitled **“",**Thesis Title Here! in partial fulfillment of the requirements for the award of the **Master of Technology in Artificial Intelligence & Machine Learning, Department of Computer Science & Engineering** is an authentic record of my own work carried out during a period from Start Month,Year to End Month,Year under the supervision of **Supervisor Name, Designation**, Computer Engineering Department.

The matter presented in this thesis has not been submitted for the award of any other degree elsewhere.

Signature of Candidate

Your Name Here!

Roll No. Roll No Here!

This is to certify that the above statement made by the candidate is correct to the best of my knowledge.

ACKNOWLEDGEMENT

First of all, I express my gratitude to the Family, who blessed me with the zeal and enthusiasm to complete this research work successfully. I am extremely thankful to my supervisors Supervisor Name Here, Supervisor Designation, Department of Computer Science and Engineering, SRM University – AP, for their motivation and tireless efforts to help me to get deep knowledge of the research area and supporting me throughout the life cycle of my M. Tech. dissertation work.
