Abstract. An abstract is a shortened version of the paper and should contain all information necessary for the reader to determine: (1) what the objectives of the study were; (2) how the study was done; (3) what results were obtained; (4) the significance of the results. The typical length of an abstract is 150 – 300 words.

Keywords: Keyword1, keyword2, keyword3, etc.

1 Introduction

We request authors to follow this guideline and format their manuscripts exactly the same as this document.

Tabel 1: Table example

Heading	Column 1	Column 2	Column 3
Item 1	1	2	3
Item 2	1	2	3

2 Page Dimensions

All material on all pages should fit within an area of A4 (21 x 29.7 cm), 1.95 cm from the top of the page and ending with 1.8 cm from the bottom. The left and right margins should both be 1.6 cm. This article demonstrates an example for you to prepare your article for submission to ICLS2022. Please strictly follow the guideline submit a compiled pdf version in the manuscript submission. You will be asked to submit the LaTeX source files via email later. The maximum length is 6 pages including references.

3 Main Text

This section provides details for typesetting your manuscript according to the formatting guidelines set for ICLS2022 16th International Congress on Logistics and SCM Systems conference. Use regular font for typesetting of the main text in the document. The main text starts at the top of the page and continues in a two-column format.

3.1 Mathematics

Symbols and shorter expression can be placed within the text, e.g. $\epsilon[]0$. More complex expression should be placed in a center of a new line:

$$E = mc^2 \tag{1}$$

Equations should be referred just like figures and tables, e.g. Eq. (1). Unless it is absolutely necessary, equation numbers should not have part to them, e.g. instead of using Eq. 1(a) and Eq. 1(b). Number them as Eq. (1) and Eq. (2).

3.2 Figures/Table/Captions

Place tables/figures/images on the top of each column (see Table 1 and Fig. 1). Each figure or table must include a caption set in 11-point Times New Roman regular font, placed below the figure or table. The caption is left justified.

Reference to the figure should follow the format "Fig. 3". Use "Figure 3" instead if it is at the beginning of a sentence. Figure numbering and referencing should be done sequentially, e.g. Fig. 3, Table 1, etc. Use Fig. 1, Fig. 2, etc. for figures with multiple parts.

Acknowledgement

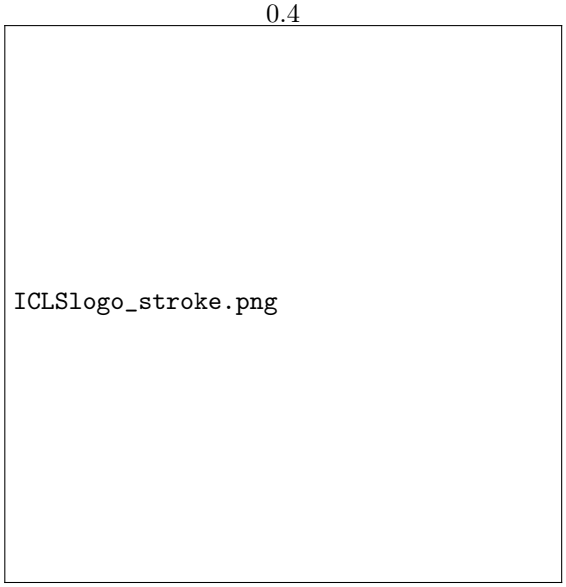

Funding supports should be acknowledged in this section.

4 In-text citation

References should be arranged by the order in which they appear in the text. The example LaTeX command for different in-text citation (please see the source code):

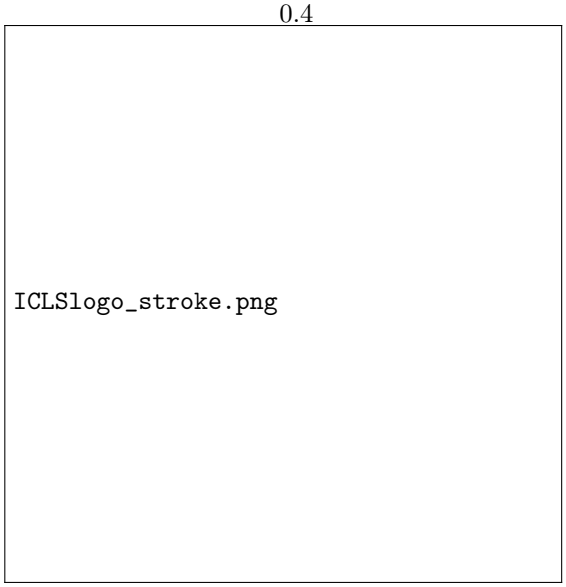

1. Worasan et al. [?]
2. worasan2020hybrid
3. worasan2020hybrid
4. Kusoncum et al. [?]
