Ringkasan

keyword1, keyword2, keyword3

1 Section title

This is a section

1.1 Sub-section

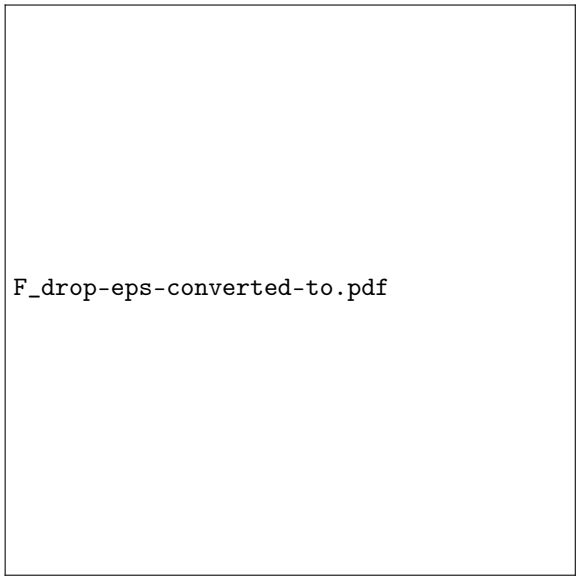

Equations come as normal, the included style file for the left equation notation of Elsevier is automatically included. So for example

$$A = B + C \tag{1}$$

or an aligned equations $\dot{x} = A\,x + B\,u$
$y = C\,x$ But also the starred versions work: A = B + C or an aligned equations $\dot{x} = A\,x + B\,u$
$y = C\,x$
[2]
The subsubsection then appears like:

1.1.1 Subsubsection

This gives all numbered titles. [**?**]

Paragraph r0.5 

The world in a drop Figure 1.1.1 shows the word in a drop –

2 Starred section commands

The starred section commands, which do not show numbering, are not available.
