Outline

First Main Section
- First Subsection
- Second Subsection

Second Main Section
- Subsection

Third Main Section
- Subsection

Final Comments

First Slide Title

Columns, Itemize and Enumerate

- Point A
- Point B
  - part 1
  - part 2
- Point C

1. Point A
2. Point B
   a. part 1
   b. part 2
3. Point C
4. Point D

Second Slide Title

Figures

If you use Tikz, your figures' font and size will match the font used in the text.

[domain=0:3] [draw=Blue, line width=1.2pt, smooth] plot (, 0.2+ $(2/3)^0.5 * sin(3.14 * r/3))node[right]\hbar\omega_1$; [draw=Purple, line width=1.2pt,smooth] plot (, 0.9+ $(2/3)^0.5 * sin(2 * 3.15 * r/3))node[right]\hbar\omega_2$; [draw=Red, line width=1.2pt, smooth] plot (, 2+ $(2/3)^0.5 * sin(3 * 3.14 * r/3))node[right]\hbar\omega_3$; [line

[name=plot1, height=4.5cm,width=ylabel= $f(x)$, xlabel= x, ymin=-1.0, ymax=30, xmin=-5, xmax=5, legend style=draw=none,fill=none, legend pos=north east,] [color=Red, mark=* ,mark options=scale=0.5,solid] x^2; x^2 [line width=0.3mm, Blue] x + 10; $x + 10$

Third Slide Title

Blocks, Theorem and Examples

Block Title

Block by definition produces a purple block with it's own title.

Theorem

Theorem by definition produces a red block with the title Theorem and italic text.

Example

Example by definition produces a blue block with the title Example.

Fourth Slide Title

Tables

Here is a table!

Head 1	Head 2	Head 3
cell 1.1	cell 1.2	cell 1.3
cell 2.1	cell 2.2	cell 2.3
cell 3.1	cell 3.2	cell 3.3
cell 4.1	cell 4.2	cell 4.3

Fifth Slide Title

Equations

Here is the time-dependent Schrödinger equation:

$$i\hbar\frac{\partial}{\partial t}\Psi(\mathrm{r},t) = \left[-\frac{\hbar^2}{2m}\nabla^2 + V(\mathrm{r},t)\right]\Psi(\mathrm{r},t). \qquad (1)$$

Summary

- The first main message of your presentation.
- The second main message of your presentation.

- Outlook
  - To do in the future.
  - Also to do in the future.
