Outline

1 Before you start

Overleaf users

Warning You can ignore this slide if you're **not** working with Overleaf.

Overleaf, Beamer and Biber do not always get along well together. For this reason, if you make a mistake while writing this presentation, in the drop-down error message you'll **always** get Biber-related error messages.

Luckily, you just have to click on "`go to first error/warning`" and the UI will scroll to the line containing your mistake.

[fragile] Compiling

Warning You can ignore this slide if you're working with Overleaf.

To compile this deck you'll need the `biber` package. Probably your TEXeditor already supports it; if not, you will easily find online the instructions to install it.

If you're not using an editor, you can compile this presentation using the command line by running:

```
$ pdflatex main.tex
$ biber main.bcf
$ pdflatex main.tex
$ pdflatex main.tex
```

2 Colors

Colors

For this template we defined four colors, following the Style Manual of the University of Udine:

-
-
-
-

You can use these colors as you want in your presentation. For example, you can **color the text in gold** by writing `\{UniGold}{my gold text}`.

We also redefined many of the most common LATEX and Beamer commands, like `itemize`, `block`, etc. You will see samples of these commands in the following slides.

3 Blocks

This is a page with a title and a subtitle And also some blocks. Goal of the mission Shoot in the Death Star's exhaust port and destroy it before the it can fire on the Rebel base. Take care! TIE Fighters may chase you while approaching the target. Use the force you must Remember your training with Obi-Wan, and use the Force to make the perfect shoot.

4 Enumerates, itemizes and description

4.1 Enumerates and itemizes

Enumerates and itemizes

This is an example of `itemize`.

- A long time ago in a galaxy far, far away...

And this is an example of `enumerate`.

1. Go to the Death Star.
2. Find the exhaust port.
3. Make the perfect shot.
4. Become an hero.

4.2 Description

[fragile] Description This is an example of `description`.

<2->[Vader] *I am* your father.

<1->[Luke] No. No! That's not true! **That's impossible!**

<3>

And while we're here, let's have a look to `verbatim` as well, to see how we made items appear in arbitrary order:

```
\begin{description}
  \item<2->[This is the first item] one
  \item<1->[This is the second item] two
\end{description}
```

5 Maths

Maths A formula will look like this:

$$x^2 + y^2 = z^2$$

You can number equations as well:

$$1 + 1 = 2 \tag{1}$$

$$1 + 1 = 2 \tag{custom label!}$$

If you want to use the default LaTeX math fonts, just go to `beamerfontthemeuniud.sty` and uncomment the line containing '`\usefonttheme[onlymath]{serif}`'.

Theorems

The usual `theorem`, `corollary`, `definition`, `definitions`, `fact`, `example` and `examples` blocks are available as well.

There exists an infinite set. This follows from the axiom of infinity. [Natural Numbers] The set of natural numbers is infinite.

6 Other blocks

Other blocks

Here we display examples of `abstract`, `verse`, `quotation`, and `quote`.

Abstract

This is an abstract.

This is a verse.

This is a quotation.

-Han Solo

A quote this is.

-Yoda

7 Bibliography and Publications

[fragile] Bibliography

You can cite an article

- normally using `\cite`, e.g.: ([**?**])
- or display the full citation using `\fullcite`, e.g.: article1

Look at the code of the following slide to see how to automatically split the bibliography on many slides. You can also use `\nocite{*}` to display the non-cited publications as well.

[t,allowframebreaks] Bibliography

8 Bonus Commands

[fragile] Framecard

You can display a frame with a colored background and a huge text in the center using the command `\framecard`.

For example, you can write:

```
\framecard{A SECTION\\TITLE}
```

This will display a frame with a orange background and the phrase "A SECTION TITTLE" in the center. You can also use a custom color with `\framecard`:

```
\framecard{A SECTION\\TITLE}
\framecard[UniBlue]{A SECTION TITLE\\
WITH A CUSTOM COLOR}
```

You can see the results of the commands above in the following slides.

A SECTION
TITLE [UniBlue]A SECTION TITLE
WITH A CUSTOM COLOR

[fragile] Framepic

You can display a frame with a background image using the command `\framepic`. The image will be **adapted vertically** to fit the the frame.

For example, you can write:

```
\framepic{graphics/darth}{
 \framefill
    \textcolor{white}{Luke,\\I am your supervisor}
    \vskip 0.5cm
}
```

Alternatively, to make the background 50% transparent, you can write `\framepic[0.5]{graphics/darth}...`
You can see the results of the commands above in the following slides.
graphics/darth

[0.5]graphics/darth

Right-aligned text with
Semi-transparent background

[t,fragile,allowframebreaks] Other bonus commands
We provide two other bonus commands:

pdfnewline you can use `\pdfnewline` to avoid the annoying `hyperref` related warnings when using newlines in the document's title, author, etc. For example, in this presentation the author is defined as:

```
\author[Luke Skywalker]{
  Luke Skywalker, Ph.D.
  \pdfnewline
  \texttt{luke.skywalker@uniud.it}
}
```

marker you can use `\marker` to highlight some text. The default color is orange, but you can also [UniBlue]use a custom color. For example:

```
\marker{Default color}
\marker[UniBlue]{Custom Color}
```

framefill you can use `\framefill` to put the text at the bottom of a slide by filling all the vertical space.
